1 388 980

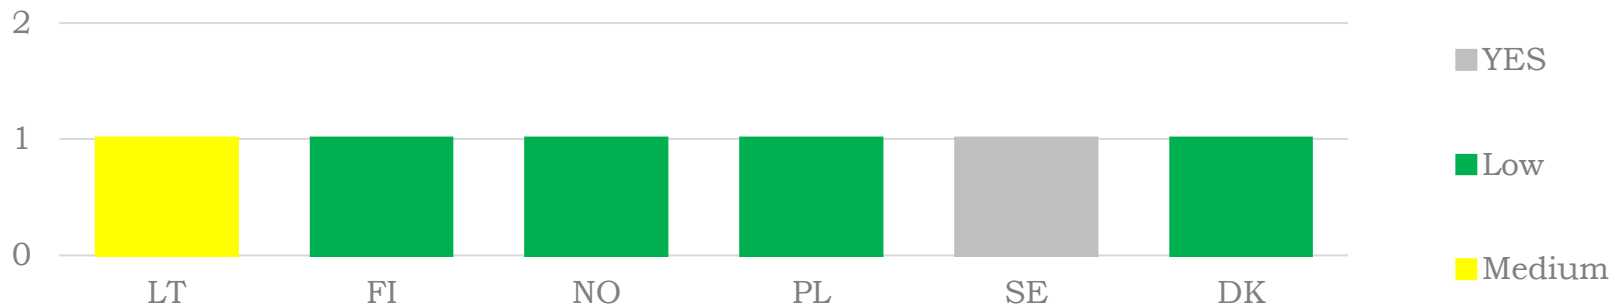

1. Are there nuclear power plants (NPP) or nuclear facilities in your country? If yes, please specify.

2. Are there NPP or nuclear facilities in the neighbouring country (-ies)? Please indicate the distance to the national border: 30 km, 100 km, 1000 km?

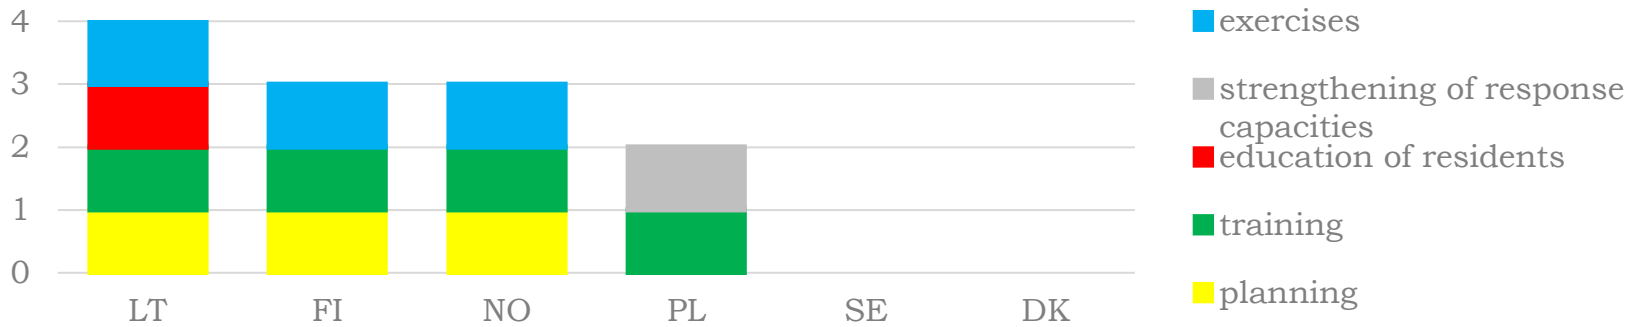

3. Is a nuclear risk assessed in your national risk assessment? Is it rated? If rated specify on its levels: high, low etc.?

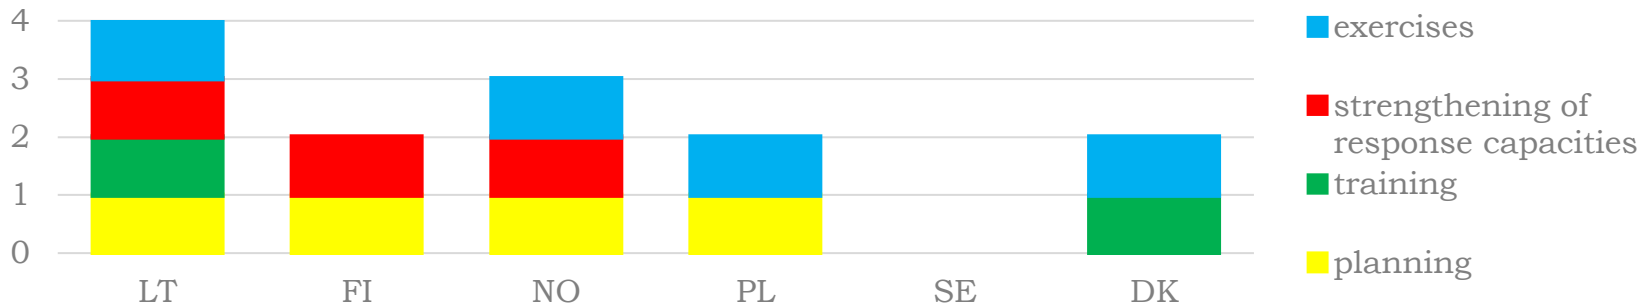

4. In your view which are the most important measures of preparedness for a nuclear emergency? (e.g. planning, training, exercises, strengthening of response capacities, information sharing, etc.)

At local level:

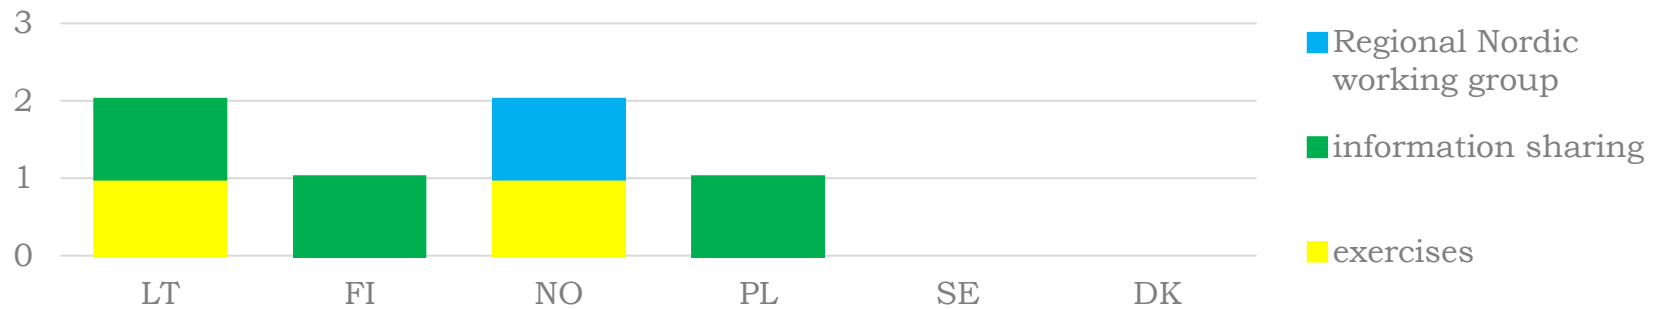

At national level:

4. In your view which are the most important measures of preparedness for a nuclear emergency? (e.g. planning, training, exercises, strengthening of response capacities, information sharing, etc.)

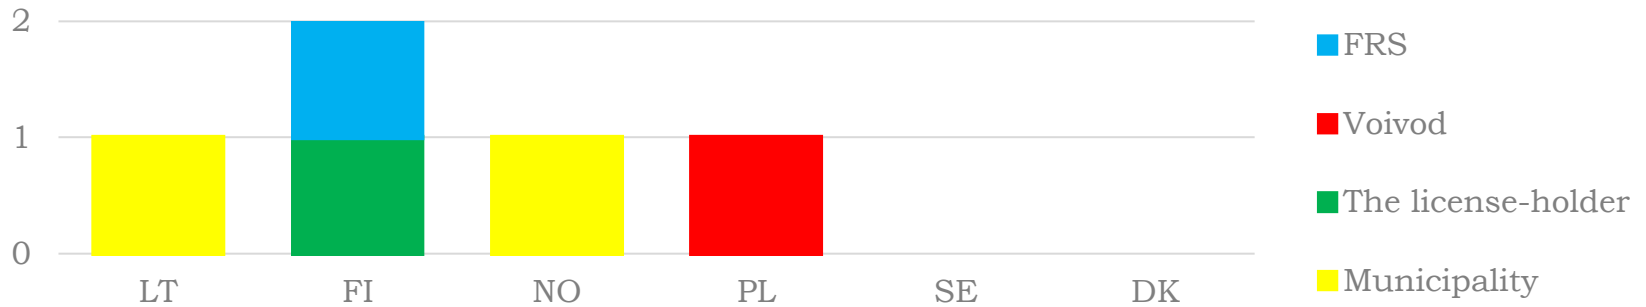

At cross-border level:

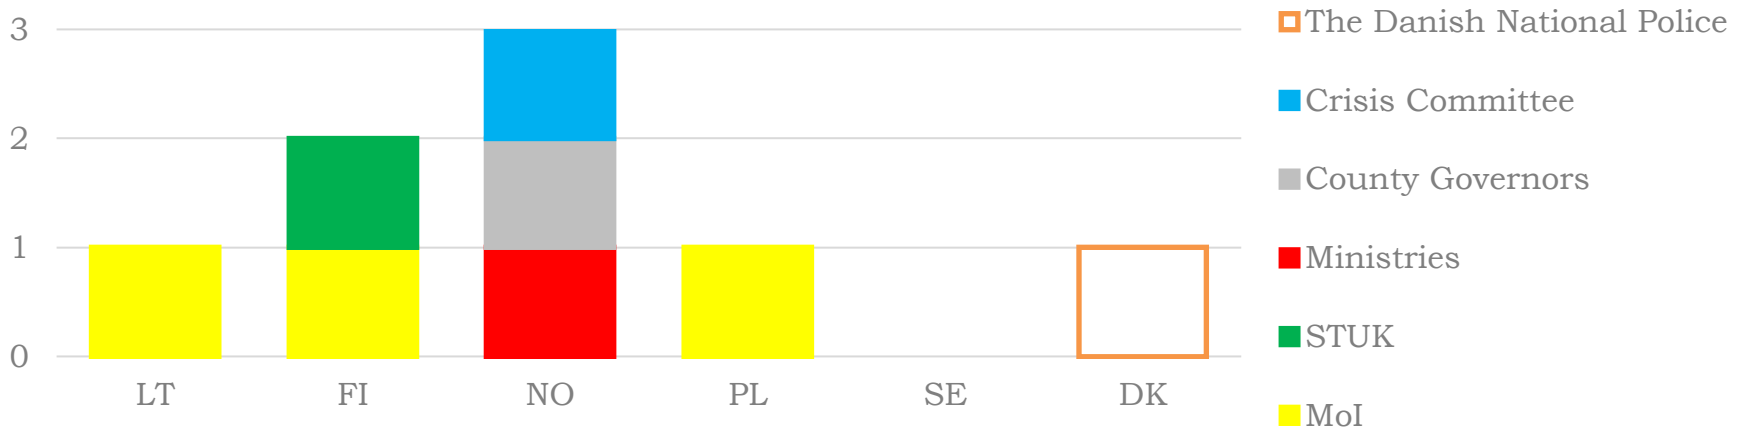

5. Do you have a national emergency response plan in case of a nuclear emergency in your country or in a neighbouring country? Specify the organisation(s) responsible for establishing and maintaining emergency management plans (at local, national and cross-border levels, as appropriate) for NPP or other nuclear facilities:

5. Do you have a national emergency response plan in case of a nuclear emergency in your country or in a neighbouring country? Specify the organisation(s) responsible for establishing and maintaining emergency management plans (at local, national and cross-border levels, as appropriate) for NPP or other nuclear facilities:

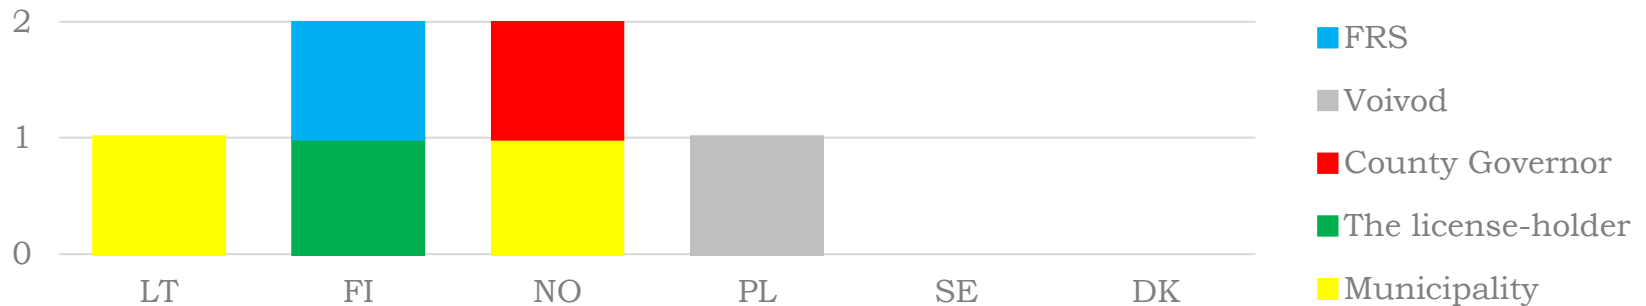

At cross-border level:

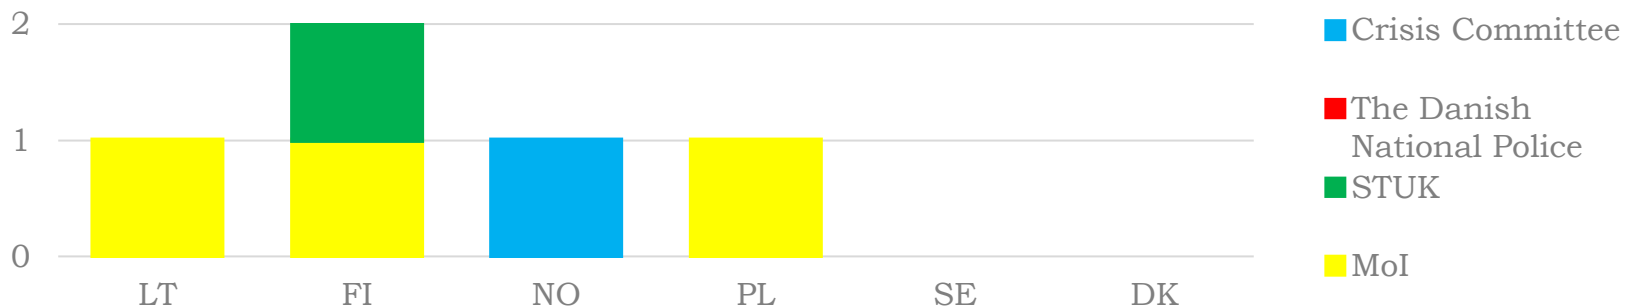

6. Specify the organisation(s) responsible for coordination of preparedness for and management of a nuclear emergency at local, national and cross-border level in your country

At local level:

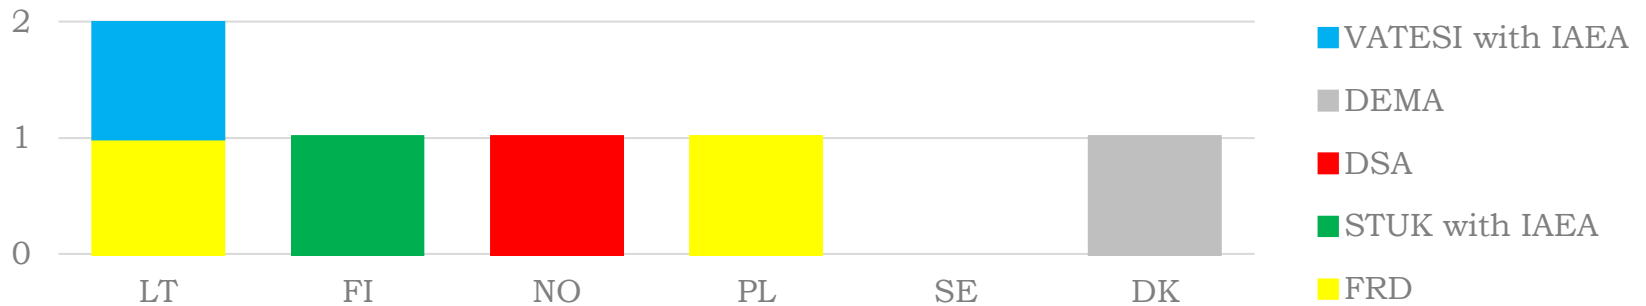

At national level:

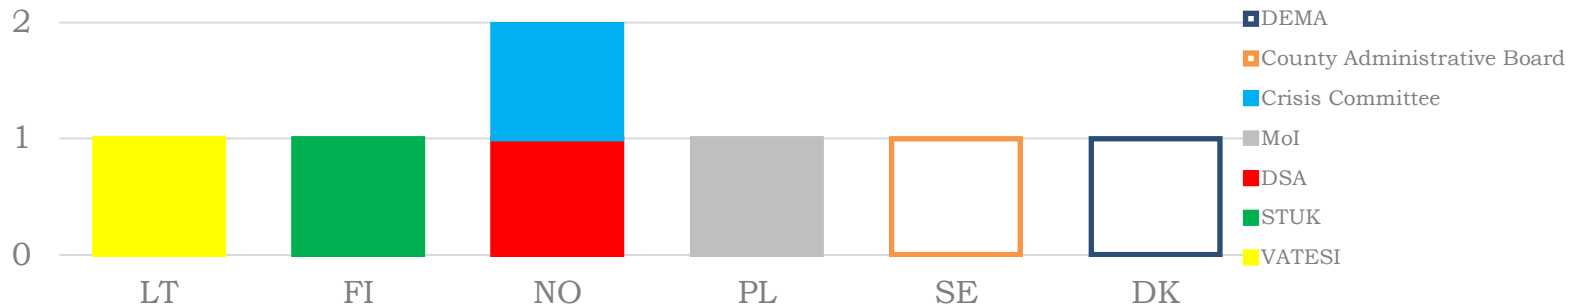

6. Specify the organisation(s) responsible for coordination of preparedness for and management of a nuclear emergency at local, national and cross-border level in your country

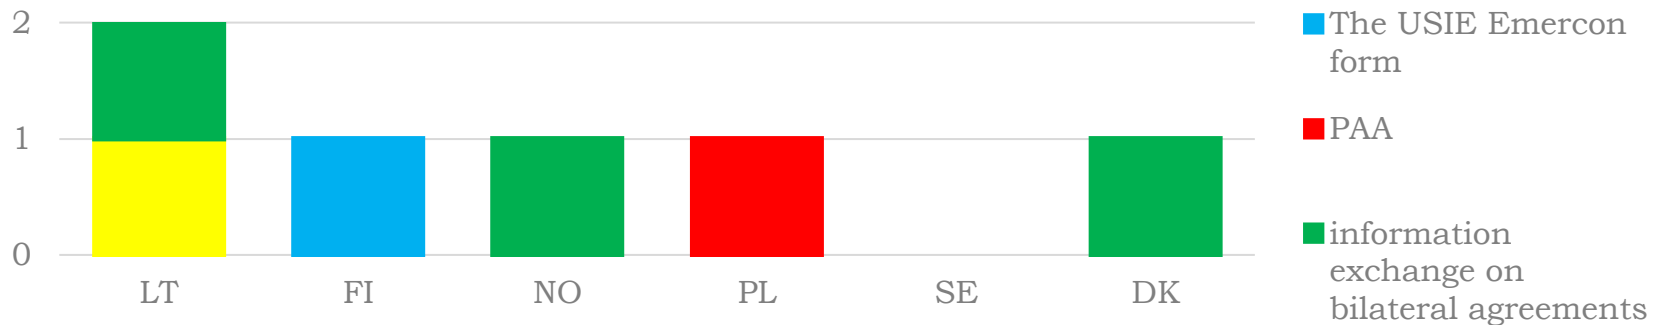

At cross-border level:

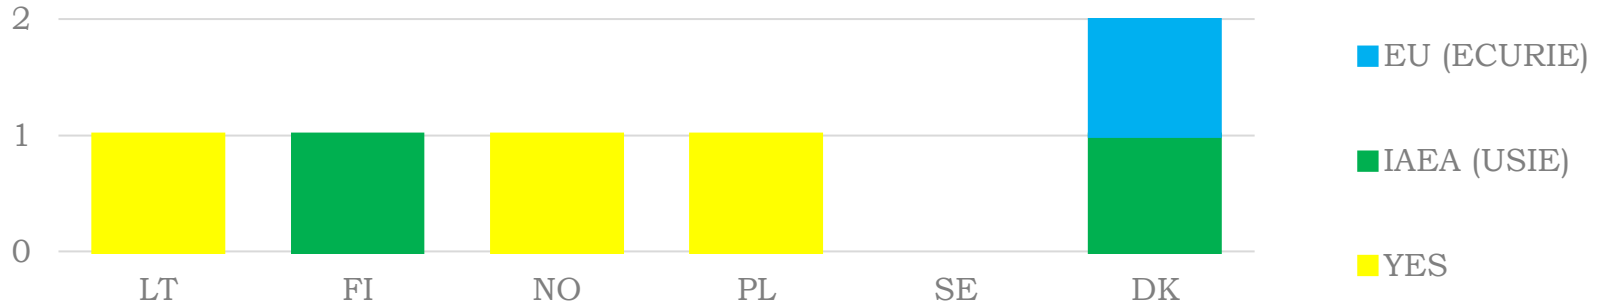

7. Specify the organisation(s) which are empowered to activate nuclear emergency response plan? (decision making chain)

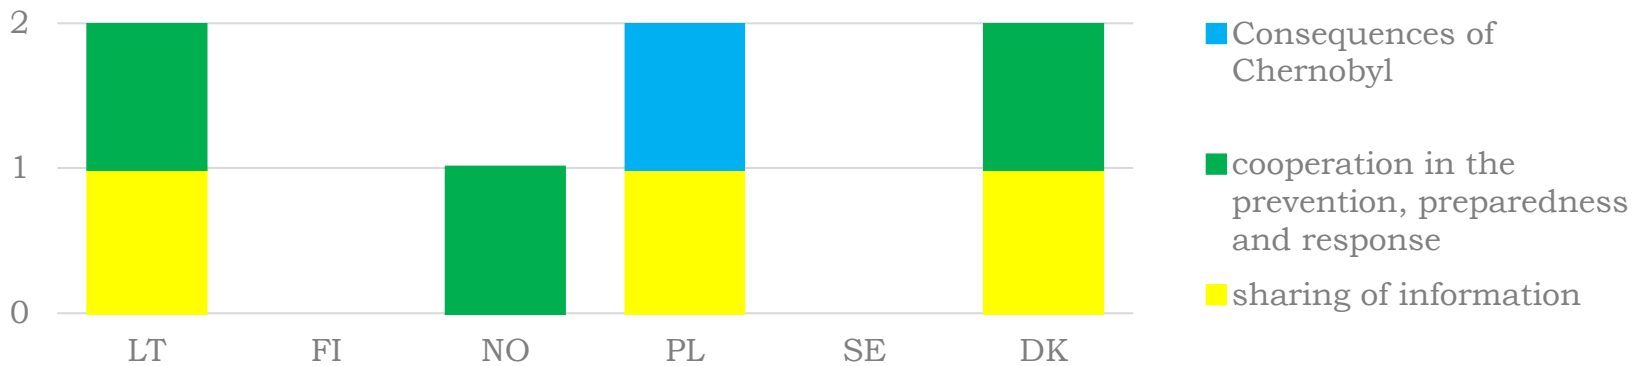

8. Summarise the institutional arrangements for informing neighbouring countries of a nuclear emergency (over and above those required by international obligations):

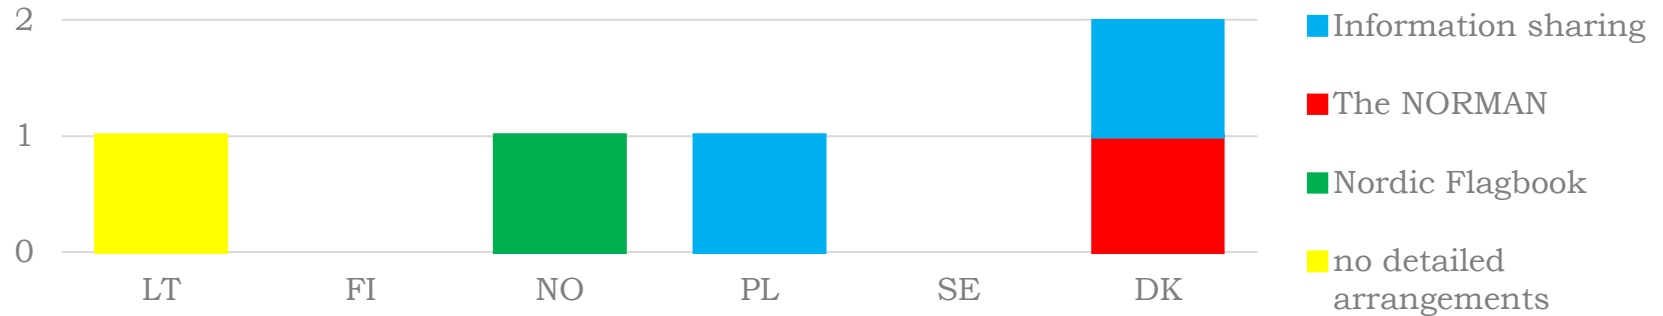

9. Do you have detailed cross border arrangements in place with neighbouring countries for responding to nuclear emergencies?

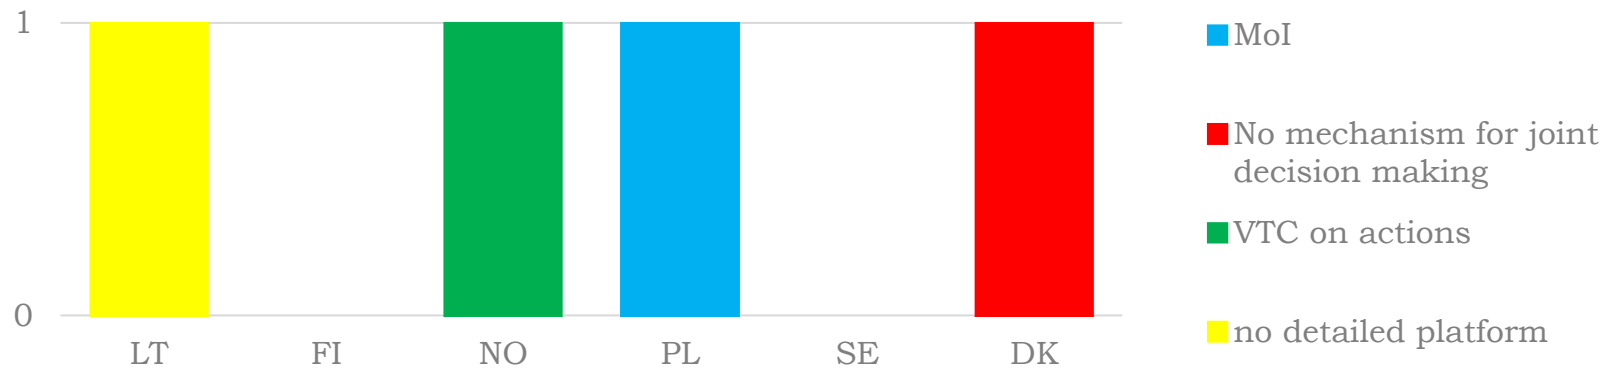

Rationale or basis for deciding to establish detailed arrangements (i.e., border within emergency planning zone (EPZ), etc):

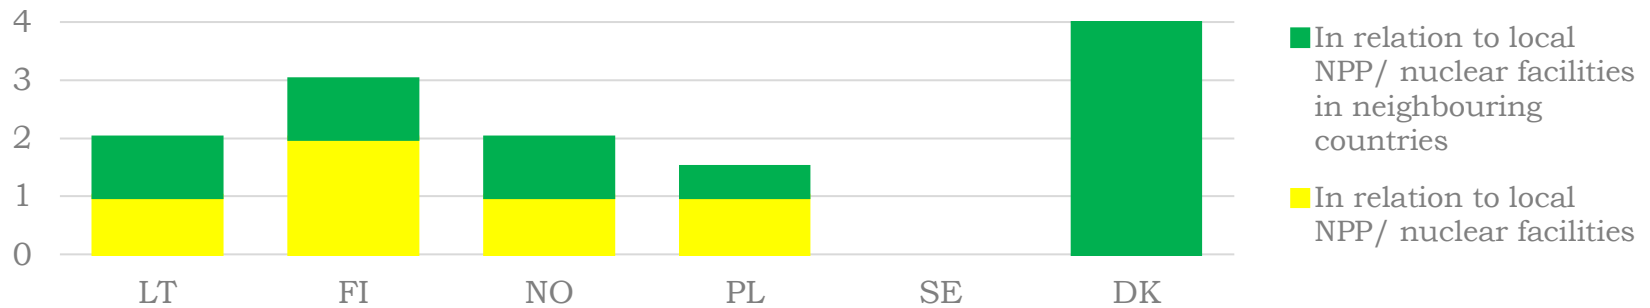

Please share general information on the main arrangements (e.g. joint response in cross-border area; mechanisms for sharing information on accident, etc.):

Summarise mechanisms for joint decision making:

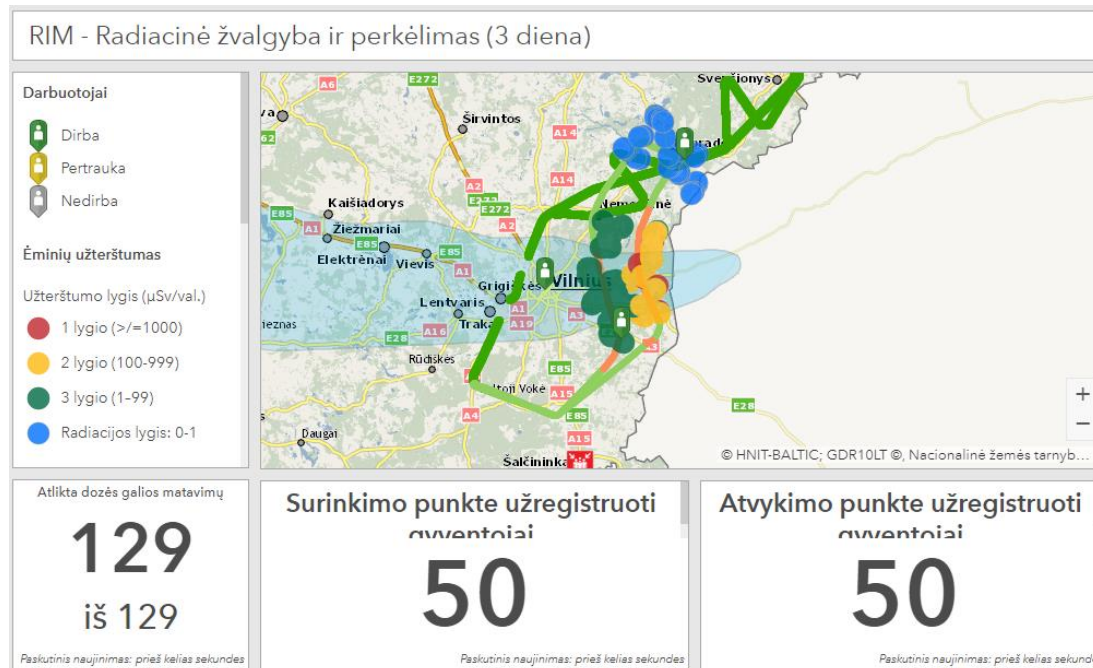

10. Specify the frequency and type of exercises (e.g., table top, field exercise of some or all functions, etc.) performed to test nuclear emergency planning and response arrangements:

FOOD FOR THOUGHT

1. Detailed arrangements, based on existing Nordic countries example to be used by all CBSS Member States
2. Common open IT platform for information sharing and coordination of decision making
3. The instant coordinated communication for all residents in the CBSS area; otherwise, the protective actions will be coordinated within FB by influencers and not by competent. authorities

THANK YOU FOR YOUR ATTENTION!
